Editorial

Ms Suman Madan

Assistant Professor
Information and Technology
Jagan Institute of Management Studies

Dear Readers

The key focus of this edition is to celebrate the spirit of alumni. From high tech companies in internet space, to clean energy, to traditional IT businesses, our alumni have created a massive value for our society that we all can look up to.

We are happy to profile the distinguished alumni of MCA. There is a lot happening on campus. We have tried to pick the choicest bits of information for you like upcoming student events and updates. And last but not least, the effort is to give you a nostalgic trip down the memory lane.

Happy reading!

Ms Surbhi Malhotra

Head Alumni Association
Jagan Institute of Management Studies

Dear Alum,

Time flies so fast
It's been a very eventful period for the Alumni Association and I can't help but feel grateful to the wonderful support you all have provided. The Alumni Office has been very busy over the last six months working to create a formal structure of the Alumni Association worldwide. We are very happy to inform you that we now have 4 city chapters in Hyderabad, Mumbai, Delhi, Chandigarh. The office-bearers of these chapters will work with the Alumni Office and serve as nodal agencies for you to connect with JIMS. We also have representatives for every batch who will help us reach out to you all. The goal of having these structures is to ensure that we reach out to everyone and collaborate in various programmes that benefit the entire JIMS community.

We encourage you to update your information on www.jimselite.org, get the contacts of your local city chapter and stay connected. Annual Alumni Dinner planned on every 2nd Saturday of December is a good example of how this structure is beginning to work. We can only go onwards and upwards from now on. I sincerely urge you to maintain the momentum. We are proud to bring you the 2013 edition of the JIMS MCA Alumni Magazine. In this edition, you will meet more alumni from a crosssection of industries, batches and programmes, articles from members of the faculty, updates from students, alumni events, reunions and class notes. Last, but not least, some very touching words and pictures that capture the essence of our campus. I still recall my first mail to all you in August 2008. And I will use the same words here again. Let's Engage, Energize and Enhance JIMS leadership through a strong Alumni Association.

Happy Reading

Success of Android

Those people who have got success in Android must have learnt:

- Passion to learn new creative things.
- Knowledge of how to use Computer/Android Versions.
- Having basic knowledge of Web & Internet.
- Little knowledge about Java programming techniques.

What is Android?

Android is an operating system for mobile devices such as smart phones and tablet computers. It is developed by the Open Handset Alliance led by "Google".

Google purchased the initial developer of the software, Android Inc., in 2005. The introduction of the Android distribution in November 2007 was announced with the founding of the Open Handset Alliance, a consortium of 84 hardware, software and telecommunication companies devoted to advancing open standards for mobile devices. Google released most of the Android code under the Apache License, a free software license.

Android consists of a kernel based on the Linux kernel, with middleware, libraries and APIs written in "C" and application software running on an application framework which includes Java-compatible libraries based on Apache

Harmony. Android uses the Dalvik virtual machine with just-in-time compilation to run compiled Java code. Android has a large community of developers writing applications ("apps") that extend the functionality of the devices. There are currently more than 250,000 apps available for Android.

Android was listed as the best-selling Smartphone platform worldwide in 2010.

Market Share by Android

Android Market features 57% of free apps – the highest percentage of any major app store – compared to 28% for Apple App Store. More than half of its apps are priced at \$2 or below compared with a minimum app price of \$2.99 on BlackBerry App World. The Android operating system may soon own nearly 50% of the Smartphone market.

According to the market researcher, more than 296 million smart phones shipped last year.

Out of that, Symbian secured 37.6 % market share, followed by Android's 22.7 % share, and BlackBerry OS with 16 % of the market.

In 2011, the number of Smartphone shipments around the world will explode to nearly 468 million units. That growth will help Android snag 38.5 % market share by the end of the year, followed by Apple's iOS at 19.4 % and Symbian at 19.2 %.

Job opportunities in ANDROID

Though it does contradict last month's study that interest in iPhone development is slightly larger than in Android development, online job board Dice.com reported that the number of Android developer want ads topped those for the phone. According to Bloomberg, "Employers requested experience or skills with Android in 987 job postings on Dice as of March 1, more than the 970 jobs asking for iPhone expertise." Overall, however, demand for both Android and iPhone development has skyrocketed from a year ago -- having increased more than threefold.

Alice Hill, managing director of Dice, told Bloomberg, "Any place that's going to hire developers of apps has to have Android. It's just as important, and it's something they have to support."

Both Android and iPhone tower over the competition in number of apps, and the size of

Let's look at the facts more clearly by analysing below table:

their app markets represent the reported 57% of companies that hired for mobile-related development in 2010. So for all the web designers out there, it behooves you to also have a mobile platform skill set.

Android, the world's most popular mobile platform

Android powers hundreds of millions of mobile devices in more than 190 countries around the world. It's the largest installed base of any mobile platform and growing fast—every day another million users power up their Android devices for the first time and start looking for apps, games, and other digital content.

Android gives you a world-class platform for creating apps and games for Android users everywhere, as well as an open marketplace for distributing to them instantly.

Android growth in device activations

Building on the contributions of the open-source Linux community and more than 300 hardware, software, and carrier partners, Android has rapidly become the fastest-growing mobile OS.

- **Every day more than 1 million new Android devices are activated worldwide**
- Android's openness has made it a favorite for consumers and developers alike, driving strong growth in app consumption. Android users download more than 1.5 billion apps and games from Google Play each month.

With its partners, Android is continuously pushing the boundaries of hardware and software forward to bring new capabilities to users and developers. For developers, Android innovation lets you build powerful, differentiated applications that use the latest mobile technologies.

- **Easily optimize a single binary for phones, tablets, and other devices**

Android gives you everything you need to build best-in-class app experiences. It gives you a single application model that lets you deploy your apps broadly to hundreds of millions of users across a wide range of devices—from phones to tablets and beyond. Android also gives you tools for creating apps that look great and take advantage of the hardware capabilities available on each device. It automatically adapts your UI to look its best on each device, while giving you as much control as you want over your UI on different device types.

For example, you can create a single app binary that's optimized for both phone and tablet form factors. You declare your UI in lightweight sets of XML resources, one set for parts of the UI that are common to all form factors and other sets for optimizations specific to phones or tablets. At runtime, Android applies the correct resource sets based on its screen size, density, locale, and so on.

To help you develop efficiently, the Android Developer Tools offer a full Java IDE with advanced features for developing, debugging,

and packaging Android apps. Using the IDE, you can develop on any available Android device or create virtual devices that emulate any hardware configuration.

- **1.5 billion Downloads a month and growing. Get your apps in front of millions of users at Google's scale**

Google Play is the premier marketplace for selling and distributing Android apps. When you publish an app on Google Play, you reach the huge installed base of Android.

The World's Largest Android Market, And Getting Bigger

Apple may be a cult sensation of sorts in the handheld device market, a media darling, but when it comes to smart phones, no one touches the Android operating system by Google. And when it comes to market share, Google's Android owes a lot of its sales power to the Chinese.

According to U.K.-based Informa Telecoms & Media, roughly two-thirds of all smart phones in Chinarun on Android, making China the biggest Android market on God's green earth. It's going to get even bigger.

"Looking forward, Android is expected to continue gaining market share globally and, by 2015, one in every two handsets sold worldwide will be powered by it. However, according to Informa Telecoms & Media, the market share of this platform could potentially peak – or even decline – after 2016 owing to a more aggressive penetration of the alternative operating systems, most notably Windows Phone," Saadi said.

What, no mention of iPhone 6? How dare he.

The iPhone and Microsoft's Windows Phone hold minority shares of China's total smart phone sales at around 5 percent and 1 percent, respectively. However, thanks to Nokia's partnership with China Mobile, Windows Phone is expected to improve its share in 2013 to 2 percent, but the iPhone is expected to lose market share unless Apple manages to create a TD-LTE, a 4G standard variant used in the Chinese market.

Android

The Fast Track

The time is the only thing constantly changing, as the way we were is far from different from way we are today and also way will be in the future. This is fact is completely justified by the whole mobile revolution going on. The feature phones that we used few year back are not in picture anymore and are replaced by the Powerful smartphones. Android & iOS are one of the major responsible factors for this revolution. As far as the contribution is concern Android is the one who had lead this revolution and as far as future is concern looks like winning the race. Android has changed the life of the million people in recent years and also changed how we see the things today. Now we carry whole world with us in our pocket. Starting from friends by connecting to social networks such as Facebook and twitter.

The android also changed the way of how we used to message people, apps like WhatsApp, FB messenger, Viber, Hike and lot more are replacing the conventional messaging in more fun way and no need to worry about balance, All you need Internet connection. Moreover you can carry your whole office stuff with you. Your emails, Document, Presentation, Calendar, Meetings and Schedules are just one touch away from you. Android device are also Entertainment powered. You can play games, watch movies, listen to songs and much more. It just like we are carrying a small computer in your pocket that is just small in size and capable of doing more than that. For your Android phone you get apps for doing almost anything. If you want to search a restaurant, ATM, tourist spot or even the nearest washroom you can do that with that. With the latest additions to android version, the things are getting easier and smarter.

The android devices are doing those thing that few year back no body was thinking that a phone will be able to do.

Did you know?

- Android Version such as Cup Cake, Ice Cream andwich and Jelly Bean are Named after Deserts.
- The newer version of the Android will be named as Lime Pie.
- Android now has more than 55% of Global Smartphone Market Share as compare to just 5% five year back.
- Now Android Market, now known as Play store has more than 800000 Apps.

Open Source wins again

The kingdom of Android

Introduction

The smart world is blooming regularly at the pace of light. The smartness is related to the fact that up to what extent and effectiveness human beings can pack up their knowledge, entertainment, and communication into a simple lump in a way that they can utilize this smartness in order to eradicate their work pressure.

This has carved a 360 degree transformation in our lives, in a way how things used to be managed as early as 5 years earlier is totally different from what it is expected today. The result is that earlier when we had to carry bulky laptops to check our important e-mails, Today the same thing can be accomplished by a smart phone; Even more, Earlier primary school children had to carry huge stack of books and notebooks in their school bags but today education world has also gone smart with the smart technology and with this all their work is stored and easily accessible at the tips of their finger via a tablet pc. Managers can track their employee performance or financial status as and when they feel so by a simple app in their smart device.

This e-smartness has a main objective to raise human intelligence not only with minimum burden on their work topology but also at minimum cost.

There are a variety of smart devices available in the market and they are powered by various Operating Systems. The war in Smartphone market is not only between the hardware manufacturers but also between the mobile phone operating system makers. Google Android, Microsoft, Nokia Symbian are amongst the top contenders.

Even though there are too many competitors for the market, Google's Android overtook every other company and now it has become the leading Operating System maker for the Smartphone. It is really remarkable for a company to achieve this in a very short span of time. You will find it really interesting if you know what is behind the popularity of Android.

Android Application Development: A craze in programming community!!

"craze is the soul of new accomplishments"

Android is the operating system, not only for Smartphone's but also for Tablet computers. Android is based on Linux and it is being developed by Open Handset Alliance, a consortium of 80+ leading hardware companies like Sony, Samsung and software companies led by Google. The Open Handset Alliance creates the standards for the mobile devices running on Android.

The question is obvious when a new product enters into the market arena led by other champion players and immediately eats up their entire market share. The most compelling thing about android is its open source nature.

With Android application development creating mobile applications is very easy because number of free start-up tools and technologies are available for custom Android application development. The ready made SDK or software development kit available with the environment for writing, testing and debugging mobile apps available with Android

makes it very easy for the mobile developers to develop customized applications. Moreover Android SDK is also very easy to understand and utilize. So mobile developers can easily and quickly .

In mobile apps development on Android mainly the C, C++ and java languages are used therefore a programmer well versed in Java can very easily learn and work on Android apps. It also provides numerous other benefits such as availability of wide and comprehensive library for audio, video, image files, 2D/3D graphics, GPS, video camera and touch screen for applications.

It is possible to create dynamic and attractive graphic works using Android's 2D and 3D graphics library. Even complex applications can be built easily and rapidly using Android because Android platform allows repetitive use of same code. This saves lot of developer's time too. The data storage is also much efficient and done in a structured way using the SQLite.

Some of the best features of Android mobile application development include its ability to collect the information fast, simple tools for application building, compatibility to audio, video and image formats and rich application development environment that enables effortless convenience to develop most attractive applications easily and in lesser time.

Because of such popularity of Android application development today a wide number of companies are offering Android mobile apps development services for creating diverse range of applications which are not only made for specific needs but are also created for specific purposes like social media apps, games apps, GPS apps, entertainment apps, travel apps, weather apps and many more.

Android: Fueled with Open Source

"Together we can and we will make bring the perfection"

Apart from its commercial values, Android being a popular open source technology has become source of satisfying programming craze of millions of programmers across the globe. Android has an active community of developers and enthusiasts who use the Android source code to develop and distribute their own modified versions of the operating system.

These community-developed releases often bring new features and updates to devices faster than through the official manufacturer/carrier channels, albeit without as extensive testing or quality assurance; provide continued support for older devices that no longer receive official updates; or bring Android to devices that were officially released running other operating systems, such as the HP Touchpad. Community releases often come pre-rooted and contain modifications unsuitable for non-technical users, such as the ability to overclock or over/undervolt the device's processor.

Historically, device manufacturers and mobile carriers have typically been unsupportive of third-party firmware development. Manufacturers express concern about improper functioning of devices running unofficial software and the support costs resulting from this. Moreover, modified firmwares such as CyanogenMod sometimes offer features, such as tethering, for which carriers would otherwise charge a premium. As a result, technical obstacles including locked bootloaders and restricted access to root permissions are common in many devices. However, as community-developed software has grown more popular, and following a statement by the Librarian of Congress in the United States that permits the "jailbreaking" of mobile devices, manufacturers and carriers have softened their position regarding third party development, with some, including HTC, Motorola, Samsung and Sony, providing support and encouraging development.

Android is an open source mobile operating system that combine and builds upon components of the many totally different open supply comes. What will this mean to you as a developer? You have got access to the supply code of the platform that's running on the phone. This will assist you higher perceive how interface controls and therefore the numerous alternative items work. If you happen to search out a bug, you'll be able to additionally submit a patch for the difficulty, though this can be a additional advanced observe.

Will the ginger bread and ice cream sandwich get tastless in future--: Whats' Next???

"Nothing is constant in this universe except change"

Vast Majority of international players like Nokia, Research in Motion, Microsoft, Apple have accepted the challenge of android and

started offering much more lucrative product offerings.

In a recent survey where in additional than 10, 000, 00 developers participated Android was voted because the way forward for all OS and is rated because the most mapped out software for developers in days to come back. This can be another excuse why developers of these days have to be compelled to conscious of basic programming languages like Java and objective C so as they're within the android app development competition within the future. Additionally since good phones go along with varied screen sizes it's vital that the app created sits well every device from usability purpose of read.

Android application developers ought to be well versed with Java SE and Object oriented programming languages. The Android market is closing to 1, 00,000 apps with reference to varied fields and is anticipated to grow additional by finish of this year. With numerous developers voting Android because the future buzz all you ought to do as a developer is to begin early and create feature made applications so as to remain prior to the competition.

Android is one in every of the rapidly growing mobile operating system platforms. Java is the heart of this platform, making it one of the most stable mobile operating systems in the world. The mobile phone market for this platform is growing at a steady 30% a year according to popular market research

MOMENTS RELIVED AT ALMA MATER 2012

10 | 18

Dandiya Night 2012

To celebrate the colours of Gujarat, JIMS organized DANDIYA 2012 on Saturday 20th October, 2012 at its Campus on the special occasion of Navratri. The magical night was fun-filled full of music, dance, colour & masti.

The night was a replica of true Gujarati colour instilled in the campus. The décor was a splurge of a picturesque decked in vivid multi colors of Gujarat. Some foot thumping performances added color to the event. As many as 180 Alumni attended the event and the event was applauded by JIMS staff, faculty and corporate. The major highlights of the event were some peppy dance numbers performances by students, solo singing (vocal & instrumental) & shayari. To add colors to the event some highlights were kept they were: Best Outfit Prize, Best Dance Moves, Best Dandiya Style, Best Couple, Best Make Up, Kid Star Performer & Most Entertaining kid of the evening . It was thoroughly enjoyed by ALL!!

Comedy Play "BIG B" (based on Munshi Premchand's story 'Bade Bhai Sahib') Theatre at its Best!

JIMS known for its reunions and extravaganza added yet another feather to its collection of uncountable memories by inviting & successfully sponsoring Comedy Play "BIG B" (based on Munshi Premchand's story 'Bade Bhai Sahib') in association with Pierrot's Troupe on Saturday, 22nd September, 2012 at India Islamic Cultural Centre, Lodhi Road, New Delhi.

It was a heterogeneous affair where the seniors and juniors came together to experience the laughter saga. The theatre was packed with around 300 guests - Alumnus, Corporate, Academicians, staff members of JIMS, where they all gathered to experience the entertainment which was rib-tickling. Truly, it was an amalgamation of reviving old memories, networking, reminiscing the past, and the best platform to keeping roots intact. The event seamlessly connected, engaged, energized and put the entire alumni into nostalgia. Memories that never fade!

Alumni Chapters

An evening to remember and reminiscence old memories where all gather to revive and cherish days spent in college. The day's most cherished and incubated at the back of the mind depicting true connection. JIMS has always been taking one step ahead for Alumni engagement. To leverage relationships JIMS have launched its Alumni Chapters in Mumbai, Chandigarh and is looking forward to launch the new ones in near future in other parts of the country.

• CHANDIGARH CHAPTER

Seamlessly connect and share thoughts & ideas!!

This time, yet again a get together was organized by Jagan Institute of Management Studies, Sector-5, Rohini, Delhi at Chandigarh, Blue Blazer adding another episode to the Chandigarh Chapter Meet on Saturday, 29th September, 2012. They all enjoyed the meet as it was an ideal way of meeting and networking.

• MUMBAI CHAPTER

JIMS again organized a Mumbai Chapter Meet on 15th September 2012 @ Ramada Plaza Palm Grove where all gathered to relive those magical moments spent at the hallowed portals of JIMS.

Annual Alumni Dinner 2012

Jagan Institute of Management Studies organized Annual Alumni Dinner 2012 at Hotel Crowne Plaza, on Saturday, 15th December, 2012.

JIMS Alumni network is a thread that binds one and all. Also, some of the outstanding achievements made by Alumni were recognized in various areas by felicitating alumni with the Awards proudly known as "JEWELS OF JIMS". These awards are given every year to selected alumni of JIMS who have excelled in industry or academia and have contributed to JIMS and society.

Annual Alumni Dinner 2012

Jagan Institute of Management Studies organized Annual Alumni Dinner 2012 at Hotel Crowne Plaza, on Saturday, 15th December, 2012. The event was a hustle bustle affair of the Alumni Network at JIMS gathering to revive and cherish some of their good old memories gained at JIMS. Therefore this meet re-invented and re-created an aura of excitement in those who wished to remember them again.

JIMS Alumni network is a thread that binds one and all. The dinner was an affair that brought networking and some good old memories. More than 300 Alumni attended the evening. Also, some of the outstanding achievements made by Alumni were recognized in various areas by felicitating alumni with the Awards proudly known as "JEWELS OF JIMS". These awards are given every year to selected alumni of JIMS who have excelled in industry or academia and have contributed to JIMS and society.

Some of the Jewels of JIMS are:

- **Manish Singh** - Country Manager at Harlequin India Pvt. Ltd.
- **Suman Chakravorthy** - Area Sales Manager-Home loans at HDFC Bank

ALUMNI INTERACTION FORUM SERIES- III

Jagan Institute of Management Studies, Sector 5, Rohini, Delhi organized Alumni Interaction Forum Series III on Saturday 12th January, 2013 at India International Centre on the topic "Importance of Networking in the Corporate world".

The informal mode of communication encouraged sound networking. This time at the event JIMS had undertaken an important issue of "Importance of Networking in the Corporate World". The reminiscence of the past was shared with all the other Alumni members where they interacted with each other.

The idea of networking is not new, the only CHANGE that has occurred is the adaptability and acceptance of it is a necessity for growth. "Networking is the single most powerful marketing tactic to accelerate and sustain success for any individual or organization". It is about making connections and building enduring, mutually beneficial relationship.

Also, networking is critical where personal relationships enable you and your organization to stand out, rise above the noise and remain top of mind. It provides the most productive, most proficient and most enduring tactic to build relationship. Networking is everywhere, on every channel medium. All these valuable tips were discussed at length at the forum.

Overall the forum was a fruitful experience for the entire JIMS Alumni's and as well as for the JIMS Fraternity. Surely it was a great communicative start.

ALUMNI INTERACTION SERIES IV

Jagan Institute of Management Studies, Sector 5, Rohini, Delhi organized Alumni Interaction Forum Series IV on Saturday 23rd February, 2013 at India International Centre on the topic "Are Marketers Spending Wisely on Social Media."

Amidst the social media buzz, this time at the event JIMS had undertaken an important issue of "Are Marketers Spending Wisely on Social Media".

ALUMNI INTERACTION FORUM – MCA

"En-route to Success" on 09th March, 2013
Jagan Institute of Management Studies successfully launched "ALUMNI INTERACTION FORUM" for MCA program on Saturday, 09th March, 2013.

Prof R.P Maheshwari, Director General, JIMS initiated the discussion by terming the rich base of JIMS ALUMNUS as BRAND AMBASSADORS.

Further, our key speaker Ms Taruna Aggarwal – Alumni (2003-2006) MCA, initiated the forum sharing some of her life experiences and explaining the different phases of life. She gave an explanation of the real facets of corporate terming it as REALITY SHOCK which is experienced in corporate life. She explained the characteristics of a professional who follows time management and is motivated to perform to attain success

All our speakers stressed on the will of Determination, Dedication and Discipline which are the three steps towards attaining success in life.

MDP

Some of the MDP's organized by JIMS

- Risk, Regulatory and Financing Aspects of Export Business on 21st November, 2012
- Application of IT towards Enhancing Operational Efficiency on 6th October, 2012
- Export Opportunities and Challenges in Key Sectors on 22nd September, 2012

To read more on MDP please log on to www.jimsindia.org

Corporate Checkmate- Essence

Corporate Checkmate is meant exclusively for our students & provides them ample opportunities to interact with senior officials from the corporates.

Jagan Institute of Management Studies, Sector 5, Rohini, New Delhi organized "Corporate Checkmate" program on the topic of "Advertising: All About Creativity or Strategy" for PGDM students on Saturday, 1st December, 2012 at its campus. The speakers at the session were:

- Mr. Sidhartha Roy, Vice President, ITC-Travel House
- Mr. Santosh Goenka, Executive Director, Business India Group

HR SUMMIT-20:20 HR STRATEGIES- THE ROUTE TO HRM 2020

Jagan Institute of Management Studies, Sector-5, Rohini, New Delhi organized National Seminar on the topic "HR Practices: Leapfrogging from best to next" at India International Centre, 40 Max, Mueller Marg, New Delhi-110003, Saturday 13th October, 2012.

The industry experts from Corporate, JIMS staff and students were a part of the session. Business groups and members from the industry included Vice Presidents, Head Human Resource Managers, Group HR Head, Head Customer Experience & Fulfillment, DGM-Corporate HR, Senior Manager- Talent Engagement Lead, and General Managers.

The speakers from all the major sectors of HR Management were present; Fedders Lloyd Group, Guardian Lifecare, Pvt, Limited, Aircel Limited, Emami Limited, Steria India Limited, Ernst & Young GSS India, Bharti Airtel Limited, FMS, Delhi University, SAIL, HTC India, Pvt, Ltd & Federal Bank, to name a few.

"ABILITY" in association with Tamanna

Jagan Institute of Management Studies, Sector-5, Rohini, New Delhi organized an event "ABILITY" in association with an NGO for multiply challenged children on Friday, 30th Nov, 2012, at its Campus. The event began with a warm welcome by Prof. R.P. Maheshwari, Director General, JIMS. Further the event saw dance performances by special children of Tamana and also by the students of Karmaarth, CSR Initiative of Jagan Nath Gupta Memorial Educational Society.

The students of Tamana gave singing and special Bhangra performances. The event showcased special talent of these differently able students. Added attractions at the event were kiosks of handmade items which were impressively made. Further, Mr. Manish Gupta, Chairman, JIMS also contributed by stating that "A small contribution to the society of under-privileged can make a huge difference". Overall, the event was a harbinger of joy for the students and for the JIMS Fraternity.

ASSOCHAM

Challenges In international Payment System and Mastering Letters of Credit
Jagan Institute of Management Studies, Sector 5, Rohini, Delhi IB Department in association with ASSOCHAM organized a one day Workshop on Challenges In international Payment System and Mastering Letters of Credit on Wednesday 19th September, 2012 at ASSOCHAM House, Prithvi Raj Road, and New Delhi.

Techbyte 2012

The Department of Information Technology, Jagan Institute of Management Studies, Rohini organized its 9th Annual IT Symposium, TechBYTE 2012 on 20th October, 2012 at PHD Chamber of Commerce and Industry, Delhi.

The symposium titled "Emerging Solutions in ICT Infrastructure and Security" concentrated on the following key areas:

- Cloud Computing as PaaS, SaaS and Haas
- Information Security
- Management of E-Waste
- Comparison of Mobile - Applications under Android, iOS 5, MANGO
- Green Computing: Standards and Solutions

Renowned personalities from the IT Industry graced the event with their presence. The Chief Guest of the day was Mr. Vibhore Sharma, CTO from Naukri.com. Mr. Vibhore Sharma talked about Cloud computing and its various services like Platform as a service, software as a service, infrastructure as a service and database as a service. He also discussed in depth the deployment models, applications of cloud computing and how industry is reaping its benefits. The Chief Convenor and Key note speaker was (Dr.) V.B. Aggarwal, Director (IT), JIMS. Overall, it was an enormous learning experience as all the audience took great interest in the event and enhanced their knowledge about upcoming IT fields.

Industry – Academia Meet

JIMS highlights the need to bridge gap between Industry & Academia In collaboration with IBM Project Praviin held the Panel Discussion

With global competitiveness raising bars in today's scenario, more than ten million of Indians graduate every year but about 5 million graduates remain jobless. Addressing the urgent need to bridge the gap between the academics and industries Jagan Institute of Management Studies, organized a panel discussion on "Meeting the Industry demand by Academia" today.

The discussion was meant for MCA students, JIMS to discuss and get clarity on Industry requirements and demands.

JIMS in collaboration with IBM Project Praviin organized the discussion where C-Suite executives from the industry i.e., Directors, CEOs & CTOs, shared their thoughts on the most vital aspects of the issues in the common interest of all the stakeholders of our educational system.

Anti-Smoking and Anti-Tobacco campaign

Jagan Institute of Management Studies organized an awareness campaign on Saturday, 17th November, 2012 at its campus on "Anti-smoking and Anti-Tobacco" in association with Hilton Hotel, Janakpuri, Delhi and Rajiv Gandhi Cancer Hospital. The campaign began with a welcome address by Dr.J.K Goyal, Director, JIMS where he introduced JIMS as one of the premier institutes in the education sector. Further Ms Kanika Arora Director, (HR) Hilton, New Delhi made a presentation on the campaign.

Later, Dr. A.K Dewan gave an insightful & a learning speech on the harmful impact of Smoking and Tobacco Consumption leading to major cause of cancer. He defined cancer as "misguided cell-uncontrolled proliferation of cell-tendency to invade and spread distantly". Further, he stated that 11 Lac cancer cases occur every year in India with 1/8 deaths attributable to cancer with more than 40% deaths attributable to tobacco. Further he stated the DO's and DON'T's of Cancer and stated that it is curable if detected early. He stated that each individual can be a brand ambassador to contribute to the cause of anti smoking campaign by

- Mass screening programmes
- Participate in Anti-Tobacco Campaign
- Contribute towards Cancer research
- Strategic Alliance
- Create Awareness be the brand ambassador

XVIII Annual Convocation

Jagan Institute of Management Studies had its 18th Annual Convocation Ceremony on 12th January, 2013 in its campus at Rohini, Delhi. The guests of honor were Dr. Ashok Gulati, Chairman, CACP and Prof. Satya P. Das; Director Indian Statistical Delhi.

JIMS at its Convocation Ceremony awarded the degrees/diplomas to its 2009-2012 batch of Master of Computer Applications (MCA) & PGDM (PT) and diplomas to 2010-2012 batches of Post Graduate Diploma in Management (PGDM), PGDM-IB and PGDM-RMM.

The felicitation ceremony that followed was a spectacle to watch for the friends and faculty members of the Alumni, as they went up on stage attired in their marvelous robes, and caps to receive their degrees, and diplomas from the Guests of Honour.

Ms. Annu Goyal, PGDM Batch (2010-2012), Mr. Arpit Kapoor, PGDM-IB Batch (2010-2012), Ms. Ritu Singhal, PGDM-RMM Batch (2010-2012), Ms. Rajni Gupta PGDM Part Time (2009- 2012) & Ms Pooja Sabhawal MCA Batch (2009-2012) were awarded Gold Medals for their excellent academic performance in their respective streams.

The 18th Annual Convocation Ceremony turned out to be a huge success with the mixed emotions of nostalgia, excitement, verve and happiness.

RADIANCE 2K13 - Management Extravaganza

MUSIC, LIGHTS, & GLITTERATI were the only words that sounded and jelled with the fun and glamour at the management extravaganza RADIANCE 2K13.

The event was well planned and was an amalgamation of zeal and gaiety. RADIANCE 2k13 showcased the true spirit of management students who competed and participated to show their talent quotient.

The fiesta of JIMS had all the pomp and show by live performances and the famous RJ RAHUL MAKIN from 104.8 FM SABSE FILMI spinning everyone around with his famous quotes and with his eloquent persona and charm. The event also saw much of the twist and the turns when the DJ spun the floor with its electrifying music and grooved the crowd.

VERVE 2K13

Jagan Institute of Management Studies organized its Two Day Annual Inter College Techno Management Cultural Fest- Verve 2k13 at Jagan Institute of Management Studies (JIMS Campus), Sector 5, Rohini on 22nd February 2013 & 23rd February 2013.

Colour, music, glitz, glamour, and celebration were all that one could spot at Jagan Institute of Management Studies (JIMS) campus, Rohini. In a bid to promote the hidden talent of the students, Verve 2K13, an Annual Inter College Techno Management Cultural Fest was held as a celebration of the dynamic youth, which also brings together the creativity, intellect and wackiness of youth.

MUSIC, LIGHTS, & GLITTERATI were the only words that sounded and jelled with the fun and glamour at the day First of Verve 2K13.
